Posted On: April 04, 2019

Table Tennis England has announced a partnership with Rocca Creative to develop a new fixtures and league management platform.

Rocca Creative are the developer of SportPAD, a market-leading product in sports fixture management, and also partners with Sport:80, the developers of Table Tennis England's new membership system.

These partnerships will ensure seamless connectivity between the membership and league management platforms, resulting in a smooth experience for our members.

The new Table Tennis England fixtures and league management website will be in operation for the start of the 2019/20 season. As previously announced, this platform will be provided free-of-charge to leagues.

Ahead of this, a group of leagues will be testing the new platform in June. Any leagues which would like to play a part in the test phase and which haven't already expressed their interest, please contact joanna.keay-blyth@tabletennisengland.co.uk

Table Tennis England Chief Executive Sara Sutcliffe said: "It is very exciting to announce this new partnership with Rocca Creative. The SportPAD platform is already in existence and is being adapted to deliver what our sport needs.

"Importantly, Table Tennis England will own the new platform and can control how we develop and provide this important membership benefit free of charge to our league playing members."

Marc Rocca, Managing Director of Rocca Creative, said: "We are delighted to be working with the team at Table Tennis England on their new leagues platform, where we will be calling on our expertise in fixtures management through our SportPAD product to develop a leading-edge solution for its members."
