

A first look at TT Leagues admin area

Author: Paul Stimpson

Posted On: May 03, 2019

This is the first glimpse of the admin area of the new Table Tennis England league and fixtures management platform.

The TT Leagues project is running on time and we are currently refining the administrators area.

The admin dashboard will be accessible to league administrators to help them quickly and easily manage a league and its players. You can watch a video demonstration below to see the basic layout and navigation of the dashboard.

The dashboard aims to provide an overview of the latest activities and flag up actions required by administrators to help their league run smoothly.

In order to optimise the admin area, we sent a short survey out earlier this week to current administrators and the 100+ league representatives who have signed up to test the new system. This survey asked for input on what they would most like to see displayed on the dashboard. This insight will help ensure that the platform is as effective as possible and helps streamline the work that administrators do.

This week Table Tennis England board members and staff also began attending the club and league AGMs. Almost 40 clubs and leagues asked for a Table Tennis England representative to attend.
