

Medical & Consent Form

Author: Paul Stimpson

Posted On: August 29, 2010

Coaches are required to ensure that all players complete the [Medical Consent Form](#). The medical consent form covers the medical history of a player along with consent from either the player, parent or carer for the use of photography or video which contains images of said player. Coaches should note that any consent forms held by them are confidential and should not disclose such information with any person unless essential in maintaining care of the player.

Photographs and video of players may be used by the Coaching or Performance teams on the website or in documentation. Such material can only be used if a valid consent form is held by the Table Tennis England. If you have any queries please contact the [Coach Education Manager](#) at the Table Tennis England.
