

Gerflor Taraflex in use at Tees Sport K2 Sussex Open

Author: Russell Moore

Posted On: July 10, 2013

The Sussex CTTA is delighted to announce that it will be using Gerflor Taraflex professional flooring on 3 show courts at the Tees Sport K2 Sussex Open. The organisers believed with the quality of the field it was essential to deliver this flooring so that the players can deliver their best performance possible to enhance the quality of the spectacle for the spectators.

Taraflex™ by Gerflor is one of the world's leading indoor sports surfaces. Produced since 1947 the surface is now held in high regard all around the world by many different sporting federations. The culmination of these relationships is its constant presence at the Olympic Games since 1976 in Montreal right up to assisting in providing arguably the best ever games in London 2012.

Whilst the Olympics are the stage for elite athleticism, the vast majority of Taraflex is installed in community level facilities and education facilities. It is believed that over 50 million children play on Taraflex surfaces every day somewhere in the world.

Gerflor is happy to be supporting the Tees Sport K2 Sussex Open event and wish all those taking part the best of luck!
