

Sport England Primary Spaces fund

Author: Paul Stimpson

Posted On: March 06, 2014

Having the right place to play sport and be physically active as a child is vital in ensuring that more children are active and that is behind Sport England's investment of £18 million of National Lottery funding to improve primary school Physical Education (PE), sport and activity facilities.

The Primary Spaces fund has been established to help primary schools who have little or no outside space and can be applied for via the link below for schools looking to develop their sporting facilities. Schools will receive up to £30,000 to spend on a range of specially created packages which can be tailored to meet their needs.

This may be useful if you are interested in installing or enhancing the outdoor table tennis projects at your own school. The attached guide to outdoor table tennis below can help inform how to best use your outdoor table tennis tables.
